In 1988, AutoPLISP was a proprietary program written by Don Lewis and John Evans. It was initially released in 1985 for DOS but later ported to other platforms. As AutoPLISP was an entirely proprietary program, it was one of the first applications to allow users to work with standard drawings created with other CAD applications. It was also one of the first applications to offer AutoCAD's ability to natively read and write DWG format drawings. In 1988, AutoCAD was created as an upgrade to AutoPLISP. This program was designed to run on the Windows platform and to be cross-platform compatible. It was released in 1989 as AutoCAD, becoming the first part of the AutoCAD product line. Its first official release was 1.01. By the end of 1989, AutoCAD was released on Macintosh ca3bfb1094
