You can find more information about the... not found... problem using the link that I have provided. A: You don't need the.rar extension to download Windows Installer 4.5.10 (and then the.NET Framework 4.5.1). You can download both MSI files from here: if len(ts)!= 2 { return EINVAL } err := setattrlistTimes(path, ts, flags) if err!= ENOSYS { return err } return utimensat(dirfd, path, (*[2]Timespec)(unsafe.Pointer(&ts[0])), flags) } //sys futimes(fd int, timeval *[2]Timeval) (err error) func Futimes(fd int, tv []Timeval) error { if tv == nil { return futimes(fd, nil) } if len(tv)!= 2 { return EINVAL } return futimes(fd, (*[2]Timeval)(unsafe.Pointer(&tv[0]))) } //sys poll(fds *PollFd, nfd int, timeout int) (n int, err error) func Poll(fds []PollFd, timeout int) (n int, err error) { if len(fds) == 0 { return poll(nil, 0, timeout) } return poll(&fds[0], len(fds), timeout) } // TODO: wrap // Acct(name nil-string) (err error) // Gethostuuid(uuid *byte, timeout *Timespec) (err error) // Ptrace(req int, pid int, addr uintptr, data int) (ret uintptr, err error) var mapper = &mmapper{ active: make(map[*byte][]byte), mmap: mmap, munmap: munmap, } func Mmap(fd int, offset
