
Oradump Export Kit 4.1 Crack UPD

A: You have used the wrong kind of Query in the 2nd SELECT. Query 2 is supposed to run on the content in the SPORT_MOVIES table. You should have run another SELECT query, which SELECTs from the SPORT_MOVIES table and saves the content of that SELECT result in a temporary table, which then is used as input to the 2nd SELECT in your trigger. Assuming you have a (simple) table: CREATE TABLE demo (id INT NOT NULL, fname varchar(100), lname varchar(100), PRIMARY KEY (id)); You can use this Query: SELECT id, fname, lname FROM demo INTO #tmpdemo1; SELECT * FROM demo1 INTO #tmpdemo2; Once you have the data in #tmpdemo2, you can use it as input in a query like this: SELECT fname, lname FROM #tmpdemo2 WHERE fname = 'myfname' AND lname = 'mylname'; I hope this helps you to understand why this works. This website uses its own cookies and third-party cookies (technical and profiling) to obtain information about users and their browsing habits. In principle, these cookies allow us to adapt the website to their needs, make it more efficient and provide users with services associated with the browser they are using.
